

Educational institutions and organizations are the mainstay of our donor groups and account for almost a third of the units of blood that we collect during the year.

Even though they may not be aware, student blood donations make an enormous difference in the lives of many people.

We're very proud of them.

The faculty advisors who promote blood drives through health and science classes, school clubs, or through personal commitment have earned our gratitude and respect. Students who work on the blood drives have the satisfaction of knowing that they have made a real contribution to their community.

Our scholarship program is designed to reward your institution and the students who have performed an outstanding job on your institution's blood drive committee. Scholarships can be awarded to individual students for outstanding academic excellence, community service or can be applied to benefit your institution's educational needs and programs.

Scholarships given to a student must be sent to the institution that the student will be attending after high school graduation. (See Criteria Section)

About Us...

The Community Blood Council of New Jersey, Inc. has been serving New Jersey and Pennsylvania since 1966. Its initial goal was to serve the local hospitals in the Trenton, New Jersey area, but today has expanded to meet the needs of more than 25 hospitals in Mercer, Burlington, Gloucester, Bergen, Hunterdon, Middlesex, and Somerset Counties in New Jersey, as well as Bucks County, Pennsylvania.

We are headquartered in Ewing Township, New Jersey, where we accept whole blood, ALYX (plasma & double reds) and platelet donations, as well as providing autologous and directed donations, and therapeutic hemochromatosis services.

Blood drives can be held at almost any type of location. Two bloodmobiles, including a 40-foot self-contained unit, allow us to serve businesses, organizations and schools that may not have sufficient room to hold a blood drive within their premises.

Donation Through Education

Life Saver Scholarship Program

In order to qualify, educational institutions or organizations must agree to participate in the Community Blood Council of New Jersey “Donation through Education” program.

The program is designed to educate students, faculty and individuals on the importance of blood donations in our communities. Participants will learn the basic components of blood and the importance of each. The program will teach and guide participants through the recruitment, registration and donation processes associated with a blood drive.

Criteria

Based on your institution’s overall success of your blood drives, your educational institution or organization can qualify for a scholarship for up to \$1,000.00.

Awards to Educational Institutions

Scholarships awarded directly to an educational institution will be based upon blood drive performance during a current school or calendar year and cannot be carried over.

Awards to Designated Individuals

Scholarships awarded to individual(s) will be determined by the faculty of the participating school. Recipient(s) must be a member of the blood drive committee. Qualifying factors may include academic excellence, dedication, overall participation in the organization, and promotion of their school’s blood drive. Since CBCNJ cannot award the scholarship directly to that individual, the recipient must provide proof of enrollment in an accredited institution after high school graduation and a student school ID#. The scholarship will be issued directly to the financial aid department of the institution for the students’ educational purposes.

Hold More Drives With Us!

Educational institutions successfully host fall and spring blood drives with CBCNJ, and some schools sponsor them even more frequently. Call our Recruitment Department today to find out how your institution can qualify for a scholarship!
